

**Starplex Scientific Corp.** held a ribbon cutting ceremony at the site of their new manufacturing facility in **Cleveland, Tennessee on April 11, 2008**. Public officials and dignitaries from the City of Cleveland, Bradley County and Chamber of Commerce joined in the celebrations. Commissioner, Tennessee Department of Economic and Community Development, Matt Kisber presented Starplex with the Tennessee flag which will fly proudly with the U.S., Canadian and Starplex Corp. flags. This state of the art facility will serve the U.S. market, from within, promising quality, consistency and on-time delivery.

Due to current global market conditions, it is the optimal time to once again strengthen the U.S. manufacturing base. It is our belief that through automation and efficiency we can manufacture a cost competitive, premium quality product in the United States.

### **Proud to be in Tennessee**
